

## Reimagining CDM management to meet a changing world

### Trisus® Chargemaster drives impactful change

- Deeper collaboration between clinical and financial staff needed due to dispersed workforce

- Streamlined workflow provided by integrated solutions reduces the need for time-consuming training and support for point solutions

- Time savings with customized workflows that remove need for spreadsheets, emails, and disparate solutions for hospital and professional CDMs

- Ongoing strategic pricing analysis for price transparency requirements

- Simplified and unified view of all CDMs to manage complex financial data models

- Reduce FTE and IT time through standardizing operational/financial processes to manage growth through M&A, restructuring, and consolidation

### Simple, fast, smart chargemaster management

#### Simple

- Personalized user experience
- Seamless Workflow

#### Fast

- Improve collaboration for faster change request process
- Integrated reference for education, recommendations, and decision making

#### Smart

- Comprehensive analysis covering 100% of hospital and professional CDMs for procedures, medications, and supplies
- Dashboards highlight CDM operational and health insights providing visibility into issues, activity tracking, and analytics
- Revenue and profitability opportunities identified using data-driven intelligence
- Price and volume comparison for internal facilities, peers, and market

### What our customers are saying ”

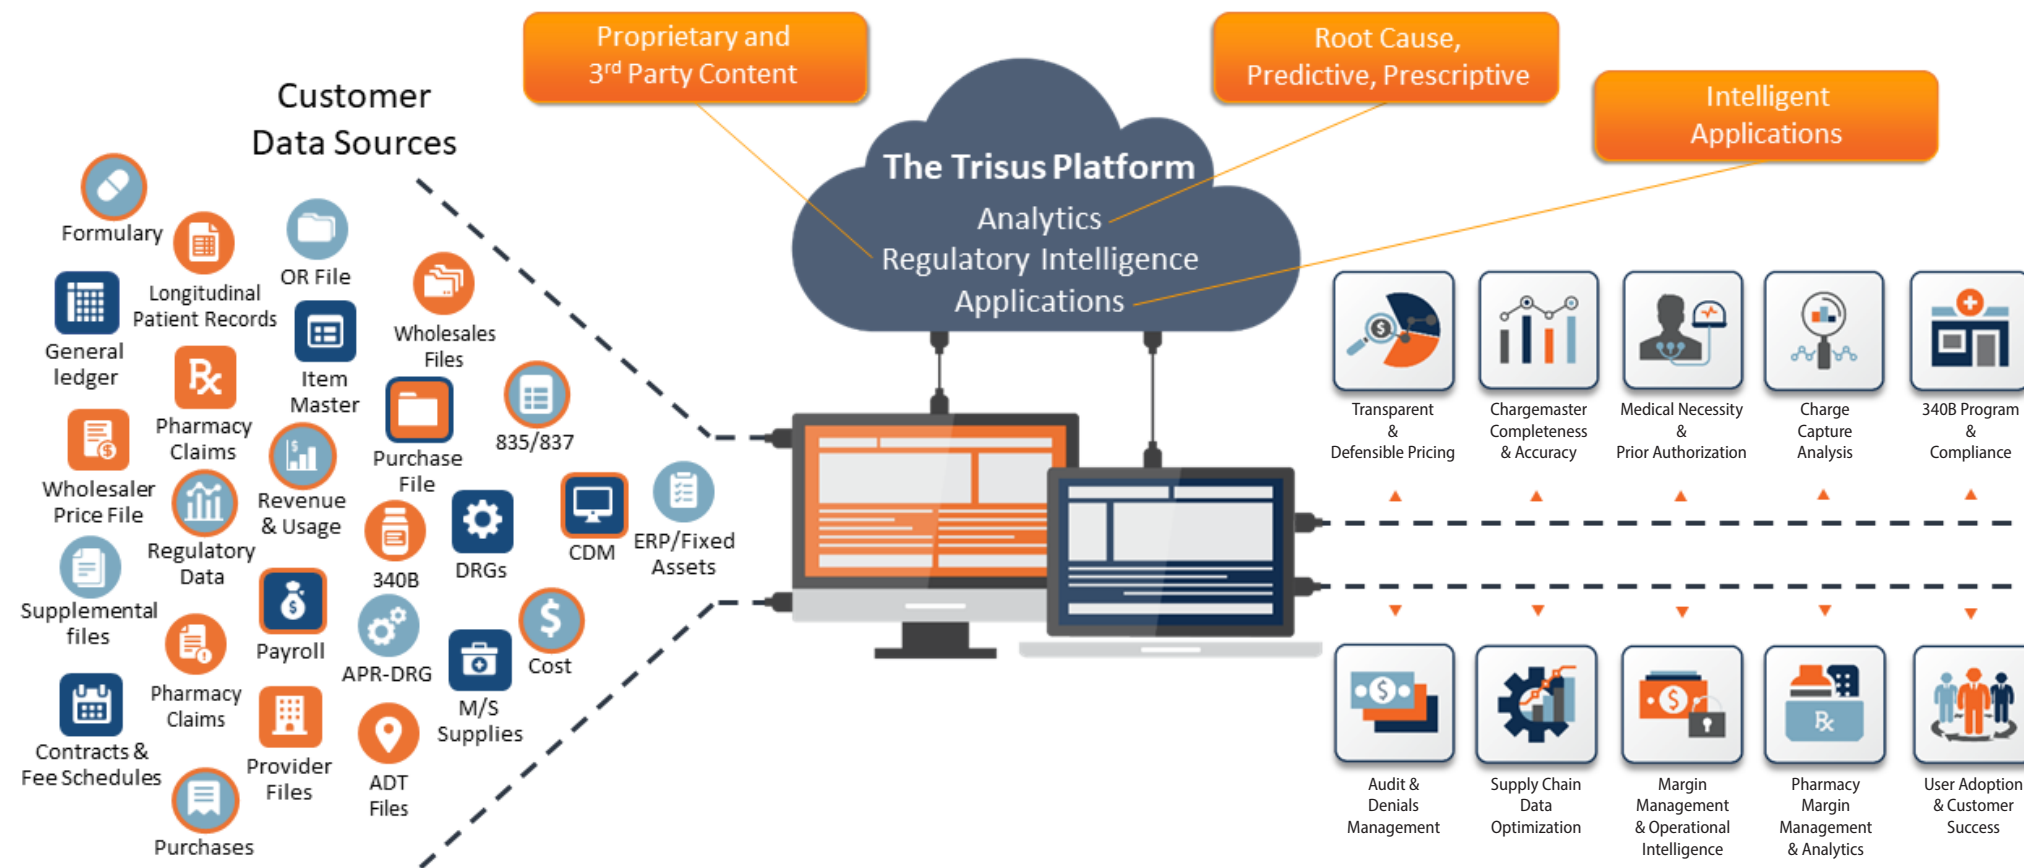

The South Panel filtering is great! It will replace a process I currently have to perform in Excel.

– Revenue Integrity/Power User

I'm excited about the detail file filtering for cost centers. Now I have to cut/paste/sort then manually send to different departments. This new feature and export option will save me so much time.

– Director/Power User

## How We Improve Reimbursement & Bring Visibility to Revenue at Risk

## What our customers are saying

This app is intuitive – a one-stop-shop where everything is in one place and the reference material is right in front of you. It's not only fast, it's smart.

– System Data Integrity Manager/Lead User

While working through implementation errors, we found two mistakes in our Epic build.

– Director/Power User

Our current change request process is a mess. I can't wait to implement change requests within Trisus.

– Revenue Integrity/Power User

## Partnering with The Craneware Group for Trisus® Chargemaster
