Top challenges in the business of healthcare are compounded by data silos, obscuring the accurate, compliant data required to make better financial and operational decisions. The Trisus Data Integrity Suite streamlines workflows, aligning data across value streams for improved charge capture, claim accuracy, and billing compliance. Enhanced functionality provides visibility into revenue capture and transparency, optimizing opportunities for additional reimbursement.

### 4. Decreased spending in Supplies associated with coding issues:

95% reduction in revenue code issues

88.3% reduction in HCPC issues

Corrected more than 3,000 issues in the change log

## Customer Testimony:

"As a healthcare finance leader, I have to manage the destiny of our organization and not allow our financial and operational functions to become victims of poorly designed processes. The Craneware Group solutions we have easily surface the areas in our value cycle that create the highest risk and pinpoints where the Revenue Team needs to build controls and triggers to monitor progress and compliance. By increasing our visibility of revenue functions throughout the organization with solutions from The Craneware Group, we can take control of our revenue streams, connect stakeholders and decision-makers, optimize the strengths of our team, and minimize our weaknesses - that all means better outcomes for our patients and our business."

- Senior Vice President, Revenue Cycle
