the craneware group™

Trisus Labor Productivity

Labor represents the single highest cost for any healthcare organization[1]. In addition, staffing shortages have resulted in a need to do more with less. Trisus Labor Productivity enables healthcare organizations to understand their daily staffing and productivity outcomes as well as support daily staffing decisions.

Trisus® Labor Productivity

Align Resources
Improve Workflow
Manage Costs

Take Control of Your Costs

Trisus Labor Productivity gives you control of your staffing and the resultant costs to your organization. It integrates payroll, timecard, hospital EMR/ADT events, and general ledger costs in one location for reporting, analysis, and strategic management of your workforce.

Optimize Your Workforce for a Strategic Advantage

Trisus Labor Productivity gives hospitals a distinct advantage in their market by providing insights into daily staffing and productivity outcomes. Using detailed analytics and predictive modeling, providers can:

Improve Workflows · **Align Resources** · **Manage Agency Staffing**

**Visualize Trends** · **Benchmark Results** · **Optimize Expenditures**

In these changing times, Trisus Labor Productivity gives you the ability to leverage your workforce for greater efficiency and effectiveness across your entire organization.

The Productivity Equation

Trisus Labor Productivity provides daily, bi-weekly, and monthly resource productivity measures. Labor-based KPIs and productivity benchmarks are tracked and used to demonstrate the efficiency of hospital staff and the resultant impact on labor costs. Each productivity indicator is tailored to the activities of the specific hospital department to allow for the most relevant and accurate measures. In addition, predictive models for staffing, activity, and labor costs enable users to determine the potential operational impact prior to enacting a course of action.

Occupancy Rate v Nurse Staffing Trend
