

Your 340B Rebate Pilot RIGHT NOW Checklist

the
craneware
group®

BEFORE JANUARY 1, 2026, EVERY COVERED ENTITY SHOULD:

Model your exposure — estimate the impact of advancing drug costs before rebates are returned.

Validate your data — make sure your 340B claims, utilization, and pricing files are accurate, complete, and defensible before submission

Plan for cash flow strain — anticipate delays in rebate recovery and assess how this could affect patient services.

Prepare for denials — establish processes for documentation and appeals, knowing manufacturers may adopt payer-style tactics.

Choose the **RIGHT PARTNER** — align with a provider-first advocate who is preparing solutions and committed to your success.
