

Referral Verification System™

Leverage referral claims to find untapped benefit

Maximize Opportunity from Referral Relationships

Referral prescriptions can play an important role in your 340B program's ability to stretch scarce federal resources. These prescriptions are often excluded from 340B eligibility because of the complexities of managing referral provider relationships, which ultimately leaves benefit dollars on the table. With Sentrex®'s Referral Verification System™, you can easily review referrals initially deemed ineligible. By connecting referrals to eligible providers and patients, you can capture more 340B opportunity.

How Much Benefit are you Leaving Behind?

1/3

of doctor visits/year generate a referral¹

About

2,000

claims per month are confirmed through Referral Verification System²

Which has realized over

~\$1.2M

in benefits per month for customers³

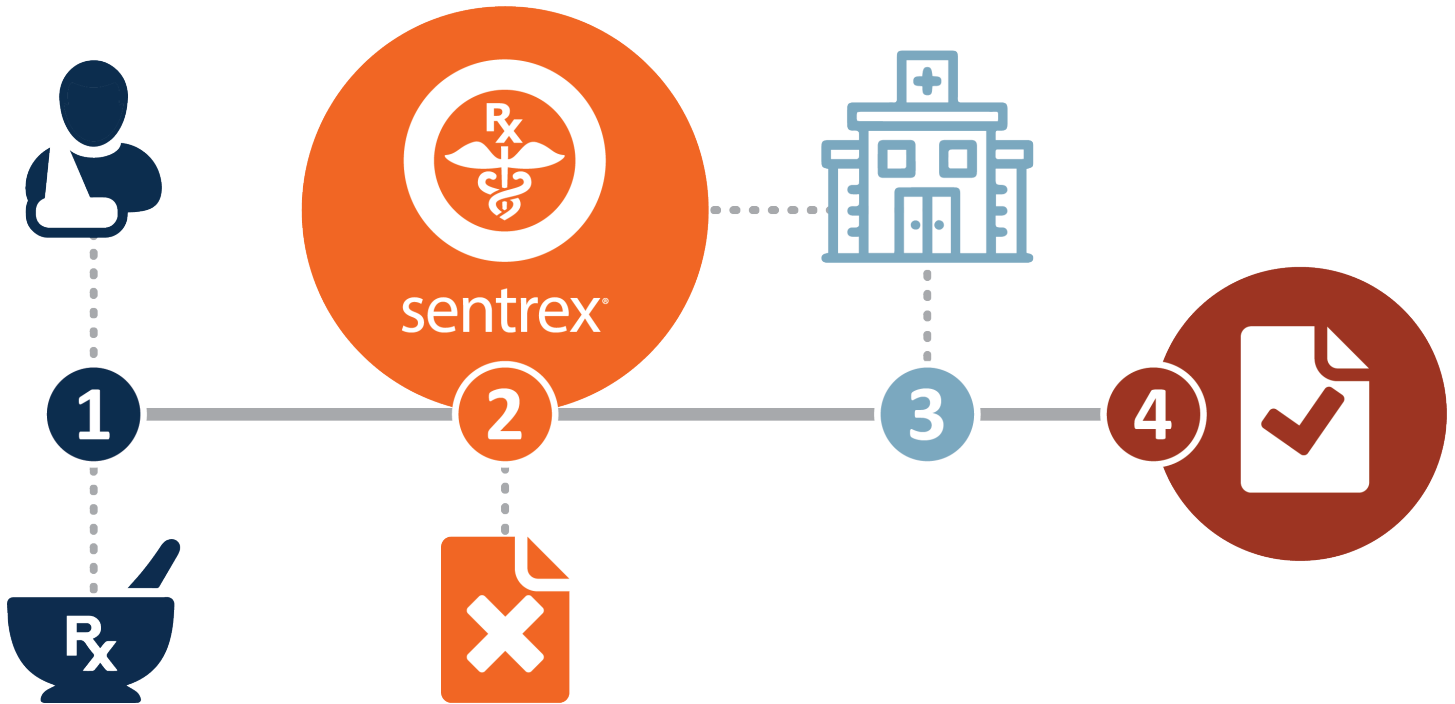

Optimize Your Program with Reclaimed 340B Benefit

Referrals are an extension of your ability to provide care leading to continuity of care, improved outcomes, and lower costs. By not overlooking referrals, you have better visibility into providing comprehensive care and ultimately drive improved financial benefits.

- Increase potential 340B benefit without additional integrations
- View claims marked ineligible due to missing or non-credentialed provider data
- Gain opportunity on prescriptions from provider referrals
- Track and report on approved referrals
- Capture eligibility from referral providers that meet compliance standards
- Create or improve the efficiency of a referral management process

Referral Verification System Workflow

Quickly and easily discover referrals that can be reprocessed as eligible claims

- 1** A patient has a qualifying event and fills their prescription at one of your contract pharmacies.
- 2** Sentrex reviews the claim, marks it as ineligible and places it in the Referral Verification System queue.
Note: Other operational configurations may apply.
- 3** You review the claim during the reprocessing window and use the Referral Verification System to confirm the provider-referral relationship.
- 4** Sentrex applies the relationship confirmation to all appropriate referral refills within the reprocessing window.

Ready to Start?

Don't leave viable claims on the table. Referral Verification System connects you to increased opportunity with no upfront fees, IT lift, or new implementations. Contact us today to learn more.

For over 20 years, The Craneware Group has partnered with hospitals and health systems across the country to help improve and sustain financial performance. Trisus Medication Formulary is one of the latest applications to be added to our Trisus Platform – The Craneware Group's innovative new way of combining revenue integrity, cost management, and decision enablement data into a single cloud-based platform.
